

DHAIRYA PATEL

+91 9898794846 | dhairyapatel3007@gmail.com | [LinkedIn](#) | [GitHub](#) | Anand, Gujarat, India

PROFESSIONAL SUMMARY

Results-driven IT undergraduate with hands-on experience in Python development, AI/ML, and full-stack web development. Proficient in building production-ready applications using Django, Machine Learning, Deep Learning, and NLP. Experienced with REST APIs, database management (MySQL, MongoDB), and version control (Git/GitHub). Developed AI-powered systems including a Face Recognition Attendance System and an Intelligent Virtual Career Advisor. Proven leadership through hackathon finalist placements and technical event coordination. Passionate about building scalable, real-world software solutions.

TECHNICAL SKILLS

Programming Languages: Python, Java

Frameworks & Libraries: Django, OpenCV, DeepFace, Pandas, NumPy

AI / Machine Learning: Machine Learning, Deep Learning, NLP, Cohere API

Web Technologies: HTML, CSS, REST APIs

Databases: MySQL, MongoDB, SQLite

Developer Tools: Git, GitHub, Power BI

Other: Data Structures & Algorithms, SMTP Integration

WORK EXPERIENCE

Software Developer Intern | **OM INFOSOLUTION INC** | Anand, Gujarat | [SAAS-APP](#) Jan 2026 – Present

- Developed and maintained web application features using Python and Django, contributing to both frontend templates and backend logic.
- Designed and optimized relational database schemas in MySQL and managed SQL data in POSTGRE SQL for various application modules.
- Built and integrated RESTful APIs to connect frontend interfaces with backend services, improving data flow and system responsiveness.
- Identified and resolved software bugs through systematic code reviews, reducing reported issues and improving application stability.
- Collaborated with the development team using Git and GitHub for version control, ensuring clean commit history and efficient code merges.

EDUCATION

Bachelor of Technology – Information Technology

2022 – 2026

Madhuben and Bhanubhai Patel Institute of Technology (MBIT), Anand, Gujarat

CGPA: 8.09 / 10

PROJECTS

Face Recognition Attendance System

Mar 2025

- Built an AI-powered real-time attendance system using DeepFace and OpenCV, automating the attendance process for registered users.
- Implemented user registration workflow capturing Name, Enrollment No., and Email with automated confirmation and attendance notification via SMTP.
- Developed attendance search by enrollment number and integrated Excel export using Pandas for data reporting.
- Tech Stack: Python, DeepFace, OpenCV, SMTP, Pandas, SQLite

Intelligent Virtual Career Advisor

Apr 2025

- Developed an AI-driven career guidance platform using Django and NLP to deliver personalized job recommendations based on user skill profiles.
- Integrated job market APIs (JSearch, Cohere) to compare user competencies against industry requirements and suggest targeted career paths.
- Incorporated resume optimization tips, interview preparation resources, and networking guidance to provide end-to-end career support.
- Tech Stack: Python, Django, SQLite3, NLP, Cohere API, JSearch API

Medicare – Medical E-Commerce Platform (Converted to SaaS)

Sep 2025

[Medicare-management-system-single-user](#)

- Built a full-stack medical e-commerce platform using Django with secure user authentication, order history tracking, and a customized admin panel.
- Designed a medicine inventory database with real-time stock management, image uploads, and a keyword-based search feature.
- Implemented a shopping cart and checkout system with discount calculation, billing generation, and order processing.
- Tech Stack: Python, Django, MySQL, HTML, CSS

VaultBank – Secure Bank Locker Management System ([vault bank](#))

- Built a full-stack bank locker management web app with token-based check-in/check-out and a complete audit trail of access logs with timestamps and duration tracking.
- Designed a multi-user locker model supporting 1–3 authorized customers per locker with model-level business rule enforcement (no duplicates, max capacity validation).
- Implemented a REST-style URL routing system with 15+ views covering CRUD for lockers & customers, token scanning, and access logging.
- Developed a responsive dark glassmorphism UI (Inter font, cyan/teal accent) with dedicated CSS breakpoints from 1200px down to 360px and smooth JS-driven sidebar animations.
- Deployed with Gunicorn + WhiteNoise for static file serving in production-ready configuration.
- Tech Stack: Python, Django, SQLite, HTML/CSS, JavaScript

CERTIFICATIONS

- Core Java Specialization – Coursera (Apr 2024)
- Introduction to Structured Query Language (SQL) – Coursera (Sep 2023)
- Power BI Workshop – Data visualization, dashboard creation, and business analytics

ACHIEVEMENTS

- Top 6 Finalist – DAIICT Hackathon: Demonstrated advanced problem-solving and team collaboration in a competitive environment.
- Winner – Business & Entrepreneurship Event, MBIT College: Recognized for innovation and entrepreneurial thinking.
